Hits Excessive Takes. Mr. Mellon's opinion is that if Con gress should cut the surtax rates to a maximum of 20 or 25 per cent, it would involve only a temporary loss in Government revenue, for he is satisfied the reduced rates would be productive of more revenue than the higher rates, due to the increase in

taxable transactions. Excessive tax rates have driven \$10,600,000,000 of the people's wealth into
tax-exempt securities, Mr. Mellon said. Lower rates, he argued, would bring a large percentage of this stock of money out into productive channels, and get into circulation, with resulting stimulus to business of every kind, and inevitably produce a stronger earning capacity for the average American.

"LIMITATION OF IGNORANCE" IS SEEN BY GOUCHER HEAD
